

**IN THE TENNESSEE PUBLIC UTILITY COMMISSION
AT NASHVILLE, TENNESSEE**

IN RE:)	
)	
PETITION OF TENNESSEE)	
WASTEWATER SYSTEMS, INC., TO)	DOCKET NO. 24-00015
AMEND ITS CERTIFICATE OF)	
CONVENIENCE AND NECESSITY)	

**PETITION TO AMEND ITS CERTIFICATE OF CONVENIENCE AND NECESSITY
TO INCLUDE THE CHESTERFIELD FARMS SUBDIVISION**

Tennessee Wastewater Systems, Inc. (“TWSI”, “Utility”, or “Company”) petitions the Tennessee Public Utility Commission (“TPUC”) to amend its Certificate of Convenience and Necessity to expand its service area to include a residential subdivision known as the Chesterfield Farms Subdivision in Bedford County.

As demonstrated in the application and attached exhibits, there is a public need for service and TWSI has the requisite management experience, financial capability, and technical expertise to provide such service pursuant to the rules and regulations of the Commission. In support of its Petition, TWSI states as follows:

General Information:

1. The applicant is Tennessee Wastewater Systems, Inc. which is located at 851 Aviation Parkway, Smyrna, TN 37167.
2. **Organizational Chart** – See Exhibit 2
3. Tennessee Wastewater Systems, Inc. is wholly owned by Adenus Group, LLC. The members of Adenus Group, LLC are Thomas Pickney, William

Pickney, and Robert Pickney. 849 Aviation Parkway, Smyrna, TN 37167. Each owns 33.3% of Adenus Group, LLC.

4. **Corporate Organizational Chart with Affiliates** – See Exhibit 4 – Adenus Technologies, LLC will provide certain materials and supplies to the project as well as panels and telemetry monitoring to the system. Adenus Solutions Group, LLC will construct the wastewater treatment system and drip field. TWSI is aware of and will abide by the Commission's affiliate transaction rules with respect to transactions between TWSI and its affiliates.
5. **Articles of Incorporation** – See Exhibit 5
6. **Tennessee Business License** – See Exhibit 6
7. **Description of Geographic Territory** – The Chesterfield Farms Subdivision is located at Longview Road and Davis Road in Bedford County. See Map as Exhibit 7.
8. **Description of the Proposed Wastewater System** – The proposed system is designed for 22,500 gpd of wastewater flow, comprised of a watertight effluent pressure collection system, utilizing STEP/STEG tanks and a recirculating media filter treatment system. The treated effluent will be land applied for disposal. The treatment system will be built in one phase.
9. **Estimated Dates for commencement and completion of construction** – Construction will commence at a time agreeable between the developer and its contractor and will take approximately 180 days. TWSI is aware of TPUC Rule 1220-04-13-.09(7) and fully expects the wastewater system to be completed within 3 years from the date of the written order granting the CCN. Notice of completion of the system will be filed in this docket as required by the Rule.
10. **Phases/Houses per Phase** – The subdivision will consist of 75 single family homes which will be built in one phase (See Exhibit 7).
11. **Builder/Developer Identity** – See Request to Serve Letter Exhibit 11

Randy Sexton, Director of Land
NAG Investments, LLC
6064 Central Pike
Mount Juliet, TN 37122

615-924-6332
randys@craftedtn.com

Existence of Public Need and Property Rights

12. **Letters from local governments and utilities** – See Exhibit 12.
13. **Franchise Agreement** – n/a
14. **Contracts and Agreements** – See Exhibit 14 (Sewer Service Agreement). Any additional relevant contract will be filed in this docket once available. The developer has not yet selected a contractor to build the system. That information will be provided in this docket as soon as it is available.

Managerial Ability:

15. **Biographies of officers and key wastewater utility staff w/ list of certifications or professional licenses** – See Exhibit 15
16. TWSI is a certified wastewater provider in the State of Tennessee. Its parent company Adenus Group, LLC owns certified wastewater providers in Alabama, and Ohio.
17. **Merger/Acquisition** – n/a
18. **Treatment System Contractor** – Adenus Solutions Group, LLC is the contractor to build the system. The contractor's license is Exhibit 18.

Technical Ability:

19. **SOP Application/Permit** – See Exhibit 19 (Application). The letter of complete application, along with the draft SOP and final SOP will be filed in this docket once issued by TDEC.
20. **State Operator Certificate** – See Exhibit 20
21. **TWSI Contact Person:**

Matthew Nicks
Tennessee Wastewater Systems, Inc.
615-220-7200
Matthew.Nicks@adenus.com

22. **Engineering Certification** –The system has not been constructed at this time. The certification will be filed in this docket upon acceptance of the system by TWSI.

Financial Capability:

23. **Financial Statements** – See Exhibits 23A, 23B, and 23C.
24. **Pro Forma** (Five years of operations) –With almost 5700 customers, the addition of 75 customers at the Chesterfield Farms Subdivision will have minimal impact to the Company’s overall finances (as shown in Exhibits 23 and 31).
25. **NARUC Chart of Accounts** – See Exhibit 25
26. **Plant in service account numbers** – See Exhibit 26
27. **Depreciation rates/schedule** – Depreciation is straight line with the following schedule:
- Building – 15 years
 - Fence – 7 years
 - Panel – 7 years
 - Tank – 10 years
 - Treatment – 26 years
28. **Estimated Cost of Construction** – See Exhibit 28.
29. TWSI will own the system once it is completed, inspected, and accepted by the Utility. Estimated amount of contributed capital will include the treatment plant and collection system, as well as the cost of the land conveyed to the Utility. These costs are not known at this time but will be filed in this Docket along with the actual cost of the treatment system when provided by the Developer to TWSI, no later than at the time the final plat is signed by the Utility. Contributed Capital is recorded when the system is commissioned (accepted) by debiting the appropriate utility plant in service asset account and crediting the CIAC account.
30. **Tariff** – On file with the Commission. See Exhibit 30 for addition of the Chesterfield Farms Subdivision to the residential tariff sheet.

31. **Five Year Build Out Estimate of Development** – See Exhibit 31
32. **Municipal Bonding Requirements** – N/A.
33. **Performance Bond** –A copy of the performance bond from the developer will be filed in this docket prior to the commencement of construction of this project.
34. **Funding Sources** - The developer is responsible for funding the construction of the wastewater system.
35. **Financial Security** – On file with the Commission.

THEREFORE, having shown that a public need exists and that TWSI possesses the requisite managerial, technical, and financial capabilities to provide service to the Chesterfield Farms Subdivision in Bedford County, Tennessee, TWSI respectfully requests the Commission's approval of this Petition.

RESPECTFULLY SUBMITTED,

Jeff Riden (BPR No. 32769)

AFFIDAVIT FOR
"CHESTERFIELD FARMS"

WHEREAS, Gary Wisniewski and Nicholas Wisniewski, of "NAG Investments, LLC", as Managers, do hereby request Tennessee Waste Water, Inc. to serve the property to be known as "Chesterfield Farms", located in Bedford County, Tennessee.

NOW, THEREFORE, BE IT AFFIRMED, the following statements:

1. The above listed members are the owners and developers of the proposed "Chesterfield Farms" subdivision.
2. The Developers have engaged Tennessee Waste Water, Inc. to provide sanitary sewer service to the proposed subdivision.
3. The Developers will convey, fee simple via Warranty Deed, the property / land for the drip fields, the treatment plant, the access etc., associated with the sanitary sewer system to Tennessee Waste Water, Inc. upon completion of the system.
4. Tennessee Waste Water, Inc. will be provided entitlement to the wastewater system at the signing of the Final Plat of the Project.

**RE: BEDFORD COUNTY UTILITY DISTRICT
CHESTERFIELD FARMS**

Dear Mr. Wisniewski:

Bedford County Utility District does not have the ability to provide sewer service to the property for the proposed Chesterfield Farms Subdivision. In addition, Bedford County Utility District cedes authority to Adenus to provide this service as the proposed operator of the STEP System.

If you have any questions, please do not hesitate to call us.

Sincerely yours,

BEDFORD COUNTY UTILITY DISTRICT

CONFIDENTIAL EXHIBIT 14

**Tennessee Wastewater System, Inc.,
Officer and Key Employee Biographies**

Tennessee Wastewater Systems, Inc. ("TWSI") is a leader in decentralized wastewater systems and technology in the Southeastern United States. TWSI has been a regulated provider of wastewater services in Tennessee since receiving its initial CCN from the Tennessee Public Service Commission, the predecessor to the current Tennessee Public Utility Commission, in 1994; currently holding over 100 certificates for territories in Middle and East Tennessee and providing service to over 3000 customers across the State.

Jeff Riden, CEO – Mr. Riden joined Adenus in 2015 as General Counsel before rising to CEO in late 2018. Prior to Adenus Mr. Riden was in private legal practice and spent over twenty years in the music business as a booking agent and artist manager, representing and guiding the careers of gold and platinum selling, and Grammy nominated musical artists, songwriters, and producers. He received his undergraduate degree from Geneva College in Beaver Falls, PA, and his JD from the Nashville School of Law.

Matthew Nicks – President – Mr. Nicks is the President of Tennessee Wastewater Systems, Inc. Mr. Nicks comes from an environmental remediation background. Mr. Nicks has worked all over the world handling and overseeing the collection, treatment, storage, transportation, and shipping of hazardous waste in a variety of industry settings. Matthew has a strong background in regulatory compliance matters including those related to OSHA, NIOSH, ANSI, NFPA, and the EPA. Mr. Nicks is also a residential developer who has developed properties in Davidson County. Mr. Nicks is a Tennessee licensed contractor.

Tom Pickney – Secretary

Bill Pickney – Treasurer

Tom and Bill Pickney entered the wastewater business in the mid 1980's by constructing low pressure pipe systems for homes, primarily in Williamson County. They were shortly joined by their brother Bob who through his engineering background added system design to their offerings. Soon Pickney Brothers, Inc. was formed and over the coming years helped bring the decentralized wastewater concept to Tennessee. Tom and Bill, along with their brothers Bob and Charles formed On-Site Systems, Inc. in early 1990's. The company was granted its first CCN in 1994. On-Site's name was changed in 2007 to Tennessee Wastewater Systems, Inc. Tom and Bill have extensive, decades long, experience and knowledge of the design, construction, and operations of decentralized wastewater systems.

Attach required additional Engineering Report Information (see website for more information)	
<input checked="" type="checkbox"/> Topographic map (1:24,000 scale presented at a six inch by six inch minimum size) showing the location of the project including quadrangle(s) name(s) GPS coordinates, and latitude and longitude in decimal degrees should also be included.	
<input checked="" type="checkbox"/> Scaled layout of facility showing the following: lots, buildings, etc. being served, the wastewater collection system routes, the pretreatment system location, the proposed land application area(s), roads, property boundaries, and sensitive areas such as streams, lakes, springs, wells, wellhead protection areas, sinkholes and wetlands.	
<input checked="" type="checkbox"/> Soils information for the proposed land disposal area in the form of a Water Resources Soils Map per Chapter 16 and 17 State of Tennessee Design Criteria for Sewage Work. The soils information should include soil depth (borings to a minimum of 4 feet or refusal) and soil profile description for each soil mapped.	
<input checked="" type="checkbox"/> Topographic map of the area where the wastewater is to be land applied with no greater than ten foot contours presented at a minimum size of 24 inches by 24 inches.	
<input checked="" type="checkbox"/> Describe alternative application methods based on the following priority rating: (1) connection to a municipal/public sewer system, (2) connection to a conventional subsurface disposal system as regulated by the Division of Groundwater Protection, and/or (3) land application.	

For Drip Dispersal Systems Only: Unless otherwise determined by the Department, sewage treatment effluent wells, i.e, large capacity treatment/drip dispersal systems after approval of the SOP Application, will be issued an UIC tracking number and will be authorized as Permit by Rule per UIC Rule 0400-45-06-.14(2) and upon issue of a State Operating Permit and Sewage System Construction Approval by the Department. Describe the following:	<input type="checkbox"/> N/A
The area of review (AOR) for each Drip Dispersal System shall, unless otherwise specified by the Department, consist of the area lying within a one mile radius or an area defined by using calculations under 0400-45-06-.09 of the Drip Dispersal System site or facility, and shall include, but not be limited to general surface geographic features, general subsurface geology, and general demographic and cultural features within the area. Attach to this part of the application a general characterization of the AOR, including the following: (This can be in narrative form)	
<input checked="" type="checkbox"/> A general description of all past and present groundwater uses as well as the general groundwater flow direction and general water quality.	
<input checked="" type="checkbox"/> A general description of the population and cultural development within the AOR (i.e. agricultural, commercial, residential or mixed)	
<input checked="" type="checkbox"/> Nature of injected fluid to include physical, chemical, biological or radiological characteristics.	
<input checked="" type="checkbox"/> If groundwater is used for drinking water within the area of review, then identify and locate on a topographic map all groundwater withdrawal points within the AOR, which supply public or private drinking water systems. Or supply map showing general location of publicly supplied water for the area (this can be obtained from the water provider)	
<input checked="" type="checkbox"/> If the proposed system is located within a wellhead protection area or source water protection area designated by Rule 0400-45-01-.34, show the boundary of the protection area on the facility site plan.	
<input checked="" type="checkbox"/> Description of system, Volume of injected fluid in gallons per day based upon design flow, including any monitoring wells	
<input checked="" type="checkbox"/> Nature and type of system, including installed dimensions of wells and construction materials	

Pump and Haul:	<input checked="" type="checkbox"/> N/A
Reason system cannot be served by public sewer:	
Distance to the nearest manhole where public sewer service is available:	
When sewer service will be available:	
Volume of holding tank: gal.	
Tennessee licensed septage hauler (attach copy of agreement):	
Facility accepting the septage (attach copy of acceptance letter):	
Latitude and Longitude (in decimal degrees) of approved manhole for discharge of septage:	
Describe methods to prevent and respond to any bypass of treatment or discharges (i.e., power failures, equipment failures, heavy rains, etc.):	

Holding Ponds (for non-domestic wastewater only):	<input checked="" type="checkbox"/> N/A
Pond use: <input type="checkbox"/> Recirculation <input type="checkbox"/> Sedimentation <input type="checkbox"/> Cooling <input type="checkbox"/> Other (describe):	
Describe pond use and operation:	
If the pond(s) are existing pond(s), what was the previous use?	
Have you prepared a plan to dispose of rainfall in excess of evaporation? <input type="checkbox"/> Yes <input type="checkbox"/> No	
If so, describe disposal plan:	
Is the pond ever dewatered? <input type="checkbox"/> Yes <input type="checkbox"/> No	
If so, describe the purpose for dewatering and procedures for disposal of wastewater and/or sludge:	
Is(are) the pond(s) aerated? <input type="checkbox"/> Yes <input type="checkbox"/> No	
Volume of pond(s): _____ gal.	Dimensions: _____
Is the pond lined (Note if this is a new pond system it must be lined for SOP coverage. Otherwise, you must apply for an Underground Injection Control permit.)? <input type="checkbox"/> Yes <input type="checkbox"/> No	
Describe the liner material (if soil liner is used give the compaction specifications):	
Is there an emergency overflow structure? <input type="checkbox"/> Yes <input type="checkbox"/> No	
If so, provide a design drawing of structure.	
Are monitoring wells or lysimeters installed near or around the pond(s)? <input type="checkbox"/> Yes <input type="checkbox"/> No	
If so, provide location information and describe monitoring protocols (attach additional sheets as necessary):	

Mobile Wash Operations:		<input checked="" type="checkbox"/> N/A
<input type="checkbox"/> Individual Operator <input type="checkbox"/> Fleet Operation Operator		
Indicate the type of equipment, vehicle, or structure to be washed during normal operations (check all that apply):		
<input type="checkbox"/> Cars	<input type="checkbox"/> Parking Lot(s): sq. ft.	
<input type="checkbox"/> Trucks	<input type="checkbox"/> Windows: sq. ft.	
<input type="checkbox"/> Trailers (Interior washing of dump-trailers, or tanks, is prohibited.)	<input type="checkbox"/> Structures (describe):	
<input type="checkbox"/> Other (describe):		
Wash operations take place at (check all that apply):		
<input type="checkbox"/> Car sales lot(s)	<input type="checkbox"/> Public parking lot(s)	
<input type="checkbox"/> Private industry lot(s)	<input type="checkbox"/> Private property(ies)	
<input type="checkbox"/> County(ies), list:	<input type="checkbox"/> Statewide	
Wash equipment description:		
<input type="checkbox"/> Truck mounted	<input type="checkbox"/> Trailer mounted	
<input type="checkbox"/> Rinse tank size(s) (gal.):	<input type="checkbox"/> Mixed tanks size(s) (gal.):	
<input type="checkbox"/> Collection tank size(s) (gal.):	Number of tanks per vehicle:	
Pressure washer: psi (rated) gpm (rated)		
<input type="checkbox"/> gas powered <input type="checkbox"/> electric		
Vacuum system manufacturer/model:		Vacuum system capacity: inches Hg
Describe any other method or system used to contain and collect wastewater:		
List the public sewer system where you are permitted or have written permission to discharge waste wash water (include a copy of the permit or permission letter):		
Are chemicals pre-mixed, prior to arriving at wash location? <input type="checkbox"/> Yes <input type="checkbox"/> No		
Describe all soaps, detergents, or other chemicals used in the wash operation (attach additional sheets as necessary):		
Chemical name:	Manufacturer:	Primary CAS No. or Product No.

**APPLICATION FOR A STATE OPERATION PERMIT (SOP)
INSTRUCTIONS**

Purpose of this form A completed SOP application must be submitted to obtain SOP coverage. This permit is required to operate a sewage, industrial waste or other waste collection and/or treatment system that does not have a point source discharge to any surface or subsurface waters. This form must be submitted at least 180 days before starting any new activity, before an existing permit expires, or when renewing a permit.

Complete the form Type or print clearly, using black or blue ink; not markers or pencil. Answer each item or enter "N/A," for not applicable. If you need additional space, attach a separate piece of paper to the SOP application. Applicants may be required to submit engineering reports, plans and specifications. Contact the division for the applicable items, or refer to Appendix 1-D of the state [Design Criteria for Sewage Works](#) for more information. **The application will be considered incomplete without supplying all of the required information, Engineering Reports, and an original signature.**

Permittee Identification/Facility Identification Describe and locate the project, use the legal or official name of the facility or site. Provide the latitude and longitude (expressed in decimal degrees) of the center of the site, which can be located on USGS quadrangle maps. The quadrangle maps can be obtained at 1-800-USA-MAPS, or at the Census Bureau world wide web site: <http://www.census.gov/cgi-bin/gazetteer>. Attach a copy of a portion of a 7.5 minute quad map, showing location of site, with boundaries at least one mile outside the site boundaries. If business is mobile give the owner of operations' home, or business office address, and list all current areas of operation by city and county.

Wastewater Collection System These types of systems require engineering reports, refer to Appendix 1-D of the state [Design Criteria for Sewage Works](#) for more information.

Land Application Treatment System These types of systems require engineering reports, refer to Appendix 1-D of the state [Design Criteria for Sewage Works](#) for more information. Public access to the treatment area must be restricted, if disinfection is not part of the treatment. Applicants completing this section of the application must also complete the Wastewater Collection System section.

Pump and Haul These types of systems may require engineering reports, refer to Appendix 1-D of the state [Design Criteria for Sewage Works](#) for more information.

Holding Ponds Given that annual rainfall onto open ponds exceeds annual evaporation (in Tennessee), the permittee must develop a written plan (to be retained on site and be available to the division upon request) that addresses how excess rainfall will be disposed of in compliance with the no discharge requirement of this permit. Treatment ponds are not to be used for stormwater treatment or storage. All new and existing point source industrial stormwater discharges associated with industrial activity require coverage under the

APPLICATION FOR A STATE OPERATION PERMIT (SOP)
INSTRUCTIONS - CONTINUED

Tennessee industrial stormwater multi-sector general permit TMSP, refer to the [website](#) for more information. Describe the system for re-routing surface runoff away from ponds in the rainfall disposal plan.

Mobile Wash Operations Indicate whether the operation is run by an individual or a corporation with a fleet of vehicles equipped to wash and collect waste waters. If a corporation, indicate the home office as the "Official Contact". Indicate if operations take place at specific sites and list those counties that apply. Note that this permit covers operations for all of Tennessee. Operations indicated as "statewide" generally apply as a fleet type operation and each office location shall be individually permitted. Equipment may be truck or trailer-mounted, or both, indicate all that applies. Soaps, detergents, and other chemicals used should be non-toxic and biodegradable. All "chemically enhanced" (soaps, detergents, and other chemicals) waste-wash waters must be collected for proper disposal. If no chemically enhanced washwaters are used, clear-wash waters may travel by sheet flow to a gravel or grassy area where there is no opportunity to enter waters of the state. There should be no discharge to a storm water inlet, ditch, conveyance, stream, etc. If you are unsure of your wash area drainage, contact the area Environmental Field Office (EFO) prior to setting up your wash operation.

Fees Refer to the TDEC-DWR Environmental Protection Fund Fee Rule 0400-40-11-.02. Links to publications are available on Department of Environment and Conservation, Division of Water Resources webpage and the webpage for the Tennessee Secretary of State.

Submitting the form and obtaining more information Note that this form must be signed by the chief executive officer, owner, or highest ranking elected official. For more information, contact your local EFO at the toll-free number 1-888-891-8332 (TDEC). Submit a complete application electronically to water.permits@tn.gov (preferred) or to the appropriate EFO for the county(ies) where the facility is located, addressed to **Attention: DWR, Permit Section**. Please keep a copy for your records.

APPLICATION FOR A STATE OPERATION PERMIT (SOP)
INSTRUCTIONS - CONTINUED

Upon receipt of the required items, the division conducts a review of the material, and the applicant is notified of any deficiencies. When all the deficiencies have been corrected, the division makes a determination of whether to publish a draft permit. When a draft permit is generated, a public notice is issued and published in a local newspaper. The draft permit is then reviewed by the applicant, and division field staff. The general public also has an opportunity to review the permit. Based on public response, a public hearing may be held. After considering public comments and a final review, the permit may be issued. The entire process normally takes from five (5) to nine (9) months. Permits are normally valid for five (5) years, except those for pump and haul systems, which are generally valid for one (1) year.

The division has the right to inspect a facility when deemed necessary. In addition, the division has the right to revoke or suspend any permit for violation of permit conditions or any other provisions of the Tennessee Water Quality Control Act and other water pollution control rules.

The division is responsible for regulating any activity, which involves a potential discharge in order to protect waters of the State from pollution and to maintain the highest possible standards in water quality.

2.0 Area of Review

Map and Parcel

Map and Parcel

BdB2	Bradyville silt loam, 2 to 5 percent slopes	106.0	62.2%
------	---	-------	-------

USDA Soils

3.0 Groundwater General Description

The attached maps indicate the Chesterfield Farms Treatment Facility wastewater treatment area surface drainage flowpath is to the south/south-west and discharging into Alexander Creek. It is assumed that the groundwater movement follows the surface flows to the south/south-east. The site is comprised of 117 acres. The topography is mainly flat. The property is located north of Davis Lane and East of Longview Road. Roughly 20% of the site is wooded, however the area of the disposal system is cleared.

The area is currently served water by the Bedford County Utility District

4.0 Population General Description

The majority of the Area of Review is agriculture land used primarily for pasture. There is a small development to the East of approximately 75 homes. Those lots are on conventional septic. See "Map and Parcel" detail on sheet 15.

5.0 Nature of Fluid

The Chesterfield Farms Treatment facility will have a peak design flow of 22,500 gallons per day of domestic wastewater. The effluent quality is typical domestic residential treated wastewater that meets State Operating Permit limits.

Daily Flow

Number of equivalent dwelling units (EDUs)	75
Daily flow per EDU	300 GPD
Daily Flow	22,500 GPD

Land Application Area

Loading Rate	0.15 GPD/SF
Area Required	150,000 SF (3.45 AC)
TOTAL Area Required including Reserve	225,000 SF (5.2 AC)

Number of Required Zones

Length of Bioline (at 5' spacing)	30,000 LF
Length per zone	4,300 LF
Number of Zones	7

6.0 General Location of Publicly Supplied Water

The area is served by Bedford County Utility District

7.0 Description of System

Treated wastewater, approximately 22,500 gpd, is pumped through the Arkal disc filter units and then distributed to HDPE drip lines with pressure compensating emitters. The drip lines are to be installed on 5-foot centers along the contours with the emitters spaced at 2-foot centers along the drip lines. Drip lines are plowed into the soils that have been approved by a licensed soil scientist and placed at an approximate depth of 8-12 inches below the ground surface. Distribution of the treated wastewater is managed through solenoid valves and controlled by a programmable PLC

8.0 Nature and Type of System

Treated wastewater from the subdivision will first be collected via pressurized PVC forcemains from the water tight septic tanks at each lot. Grey water will be pumped from the septic tank via a small diameter collection PVC forcemain to the treatment facility. The treatment facility will consist of recirculating media filter (RMF) (Bioclere system), recirculating tank, final dose tank, and arkal filter building. The wastewater will then cycle through the RMF before discharging into the final dose tank. From the final dose tank, the treated wastewater is pumped through arkal filter units and then distributed through the drip dispersal lines within the approved soil sites.

Rate Class 9	\$ 20.55	\$ 3.39	\$0.12 (R)	\$0.00	\$ 24.06*(R)

* Southridge customers will have a pass-through treatment cost assessed to their monthly bill. The pass-through treatment cost is calculated using the water meter readings as provided to TWSI by the East Montgomery Water Co. and the multiplier charged to TWSI by Clarksville Gas and Water to provide wastewater treatment. This cost will be filed annually with TPUC in June and effective upon approval. The current pass through treatment cost is 0.0096296082 per gallon.

** Each condominium unit will be billed as a residential customer and be individually billed.

*** Customers in the City of Coopertown will be billed a 3% franchise fee (applied to the base rate only).

**** The bonding fee will be updated with an annual filing with TPUC in August and effective upon approval.

Fees:

Non-Payment – 5% of total bill amount

Disconnection – \$40

Reconnection – \$50

Returned Check (NSF Fee) – \$25

Returned ACH - \$25

Capacity Reservation Fee – \$10 per month (See Rules and Regulations for Explanation)

Credit Card Convenience Fee: 2.45% with a \$1.25 minimum fee (R)(N)

City of Coopertown Franchise Fees: 3%
