RE: *Petition of Tennessee-American Water Company to Modify Tariff, Change and Increase Charges, Fees, and Rates, and for Approval of a General Rate Increase, TPUC Docket No. 24-00032*

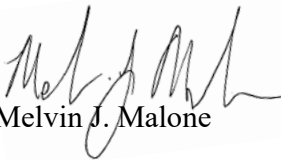

Dear Chairman Jones:

Attached for filing please find *Tennessee-American Water Company's Rebuttal Testimonies for (1) Heath Brooks; (2) Ann Bulkley; (3) Dominic J. DeGrazia; (4) Grant Evitts; (5) Nicholas Furia; (6) Larry Kennedy; (7) Bob Lane; (8) Robert V. Mustich; (9) Robert Prendergast; (10) Charles Rea; (11) Linda Schlessman; (12) Grady Stout; (13) Harold Walker, III; and (14) John Watkins* in the above-captioned matter.

As required, the original plus four (4) hard copies will follow. Should you have any questions concerning this filing, or require additional information, please do not hesitate to contact me.

Very truly yours,

BUTLER SNOW LLP

1 **I. INTRODUCTION**

2 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

3 A. My name is Robert (“Bob”) C. Lane and my business address is 109 Wiehl Street,
4 Chattanooga, Tennessee.

5 **Q. DID YOU PREVIOUSLY SUBMIT DIRECT TESTIMONY IN THIS**
6 **PROCEEDING ON BEHALF OF TENNESSEE-AMERICAN WATER COMPANY,**
7 **INC. (“TAWC” OR THE “COMPANY”)?**

8 A. Yes. I filed Direct Testimony and exhibits on May 1, 2024.

9 **Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?**

10 A. The purpose of my rebuttal testimony is twofold: (1) to explain the corrections identified
11 during the discovery process and during review of the Intervenor’s testimony and their
12 impact on the Company’s forecasted Revenue Requirement and Revenue Deficiency for
13 the Attrition Year, and (2) to respond to testimony provided by the Consumer Advocate
14 Division’s (“Consumer Advocate” or “CAD”) witnesses Mr. Dittmore, Mr. Novack and
15 Mr. Bradley and the City of Chattanooga’s witness Mr. Garrett.

16 **Q. ARE YOU SPONSORING ANY EXHIBITS WITH YOUR TESTIMONY?**

17 A. Yes, I am sponsoring exhibits TAW_RT_LANE_Exhibit 1, TAW_RT_LANE_Exhibit 2,
18 and TAW_RT_LANE_Exhibit 3, which are being submitted along with my rebuttal
19 testimony.

20 **Q. WERE THESE EXHIBITS PREPARED BY YOU OR UNDER YOUR**
21 **SUPERVISION?**

1 A. Yes.

2 **II. CORRECTIONS & IMPACT ON REVENUE REQUIREMENT AND REVENUE**
3 **DEFICIENCY**

4 **Q. PLEASE EXPLAIN THE CORRECTIONS AND THEIR IMPACT, IF ANY, ON**
5 **THE COMPANY'S FORECASTED REVENUE DEFICIENCY.**

6 A. During the discovery phase of this case, the Intervenor submitted a significant number of
7 discovery requests. TAWC invested substantial resources to cooperatively respond. In the
8 course of our efforts to timely respond to the discovery requests submitted by the
9 Intervenor and subsequently, the Company identified seven (7) corrections, the majority
10 of which were submitted to the parties in the Company's discovery responses. Overall,
11 these corrections result in a decrease of 2.1% in the Company's Revenue Requirement and
12 Revenue Deficiency. See Table 1 for a summary of these corrections:

Table 1

Cash Working Capital Revisions	(12,053)	TAW_R_CADDR1_51, filed 06/25/24
Rebuttal Adjustments Revenue Requirement	\$ 85,692,117	
As Filed Present Rate Revenues	\$ 71,724,922	
Industrial Usage Revision	\$ 134,060	Error found during Rebuttal Testimony Preparation
Rebuttal Adjustments Present Rate Revenues	\$ 71,858,982	
Rebuttal Adjustment Revenue Deficiency	\$ 13,833,135	
As filed Revenue Deficiency	\$ 14,131,001	
Change in Revenue Deficiency	\$ (297,866)	

As shown in Table 1, the Company has made the following corrections to the 2025 Attrition Year Revenue Requirement and Revenue Deficiency:

1. Removal of Severance Expenses. During discovery, the Company identified Severance Expenses that were inadvertently included in the Attrition Year Revenue Requirement. The Company has removed Severance Expenses for the Attrition Year as described in the Company's response to TAW R CADDR1 062-064 (filed 6/25/24) and is not seeking recovery of these expenses. This reduces the Revenue Requirement and the Revenue Deficiency by \$28,320.
2. Removal of Relocation Expenses. During discovery, the Company identified Relocation Expenses that were inadvertently included in the Attrition Year Revenue Requirement. The Company has removed Relocation Expenses for the Attrition Year as described in the Company's response to TAW R CADDR1 062-064 (filed 6/25/24) and is not seeking recovery of these expenses. This reduces the Revenue Requirement by \$120,889.
3. Cost of Removal Rate Correction. During discovery, the Company identified a Cost of Removal Rate that was inadvertently applied to the 340300 account. This rate should be zero for this specific account. The error in TAW R CADDR2 045 (filed 7/30/24) has been corrected and reduces the Revenue Requirement by \$166,658 due to this increase in Rate Base of \$74,825.
4. Capital Expenditures Correction. In its response to TAW R CADDR1 148 (filed 6/25/24), the Company updated its forecasted capital expenditures in account 340300 for the period January 2024 through January 2025. These updated forecasted capital additions relate to investments in Enterprise Solutions projects. Enterprise Solutions investments include the

1 Company's investment in technology projects that are completed on an enterprise-wide
2 basis for the benefit of all American Water's operating utilities, including TAWC. This
3 totals an increase in Average Rate Base of \$684,171 and added \$164,482 to the 2025
4 Attrition Year Revenue Requirement.

5 5. Inflation Factor Correction. The Company made a minor revision to its proposed inflation
6 factor for Rent, Office Supplies and Stationary expenses, as reflected in its response to
7 TAW R CADDR1 179 (filed 6/25/24). This results in a \$368 dollar reduction in these
8 expenses and in the 2025 Attrition Year Revenue Requirement.

9 6. Cash Working Capital Correction: The Company is adjusting its Forecasted Cash Working
10 Capital downward by \$108,000, as reflected in its response to TAW R CADDR1 51 (filed
11 6/25/24). This results in a reduction of \$12,053 in the 2025 Attrition Year Revenue
12 Requirement.

13 7. Industrial Usage Correction. In addition to these reductions in the 2025 Attrition Year
14 Revenue Requirement and Rate Base, the Company discovered that it had inadvertently
15 underestimated Industrial Customer forecasted 2025 revenues at present rates by \$134,060.

16 These adjustments—the Revenue Requirement reductions of \$163,803 and the increase
17 in forecasted revenues of \$134,060—result in a total reduction in the Revenue Deficiency
18 of \$297,863, from \$14,131,001 to \$13,382,010¹.

19 **III. GROSS REVENUE CONVERSION FACTOR**

20 **Q. DID MR. DITTEMORE MODIFY THE REVENUE CONVERSION FACTOR?**

¹ The Company recognizes that these changes would have small impacts on various schedules which will need to be updated when the Company calculates rates following a final decision by the Commission.

1 A. Yes. Mr. Dittemore eliminated both the TRA fee and gross receipts tax percentage from the
2 gross conversion factor. Dittemore states the reasoning as “The TRA (TPUC) fee will not
3 increase or decrease until 2026 associated with this rate change, and thus, it should not be
4 considered within the context of the 2025 attrition period results under consideration in this
5 proceeding”². Furthermore, Dittemore argued that the franchise and excise tax being a
6 deduction to the gross receipts as an additional reason for the elimination of gross receipts.
7 Dittemore also modified the conversion factor by first including the forfeited discount
8 .005373 of, whereas TAWC applied .61882%, as ratio of Late Fees to Water Revenues,
9 outside of the conversion factor.³ The modifications resulted in an overall decrease of the
10 gross up factor from the Company proposed amount of 1.414331 to 1.355850.

11 **Q. DOES TAWC AGREE TO MR. DITTEMORE’S PROPOSED MODIFICATIONS?**

12 A. No. The main driver of the difference in overall conversion factor rate is due to the
13 elimination of TRA fees and gross receipts tax. These exclusions are not appropriate, as
14 these additional expenses will be incurred based on the revenue requirement increase
15 requested. In addition, the exclusion due to the excise tax reduction is inaccurate, as the
16 excise tax deduction is based on capital balances not revenue and has been reflected in the
17 present rate expense adjustment in Petitioner's Exhibit EXP-22-General Taxes and Fees-
18 DD.

19 In regard to forfeited discounts, the Company included a late payment fee of .61882%,
20 reflected in a reduction to the gross up of the revenue requirement to arrive at the total

² *Pre-filed Testimony of Consumer Advocate Division Witness David N. Dittemore 43:19-44:2*, TPUC Docket No. 24-00032 (Sept. 17, 2024) (hereinafter “Dittemore”).

³ Consumer Advocate Exhibit, Schedule 15 Revenue Conversion Factor

revenue requirement requested. This was based on the average of the Percentage of Late Payment Fees to Revenue for 2022 and 2023. CADs discount assumption is based on the historical late payment fee as a percentage of the forecasted 2025 revenue resulting in a lower rate. This lower rate of .5373% increases the Consumer Advocate's Gross Revenue Conversion Factor, but their exclusion of the TRA fee and Gross Receipts Tax results in an overall decrease of 5.848% to the Revenue Conversion Factor compared to the Company's calculations.

Q. WHAT ARE THE COMPONENTS OF THE REVENUE CONVERSION FACTOR AND HOW IS IT APPLIED IN TAWC PROPOSED REVENUE REQUIREMENT CALCULATION?

A. The revenue conversion factor is the gross up of the effective tax rate of the current state and federal tax rates, uncollectible expense rate, the current gross receipts tax rate, and any applicable Tennessee Public Utility Commission fees ("TPUC" or "TRA" fee). The factor is applied to the Increase in Net Operating Income Required in Exhibit FS-1-Summary Revenue Requirement-BL, Schedule FS-1.1.

Q. WHAT CONVERSION FACTOR IS THE COMPANY PROPOSING/RECOMMENDING?

A. TAWC proposes the conversion factor as filed, 1.414331.

IV. TAWC'S HISTORIC EARNINGS

Q. MR. DITTEMORE'S TESTIMONY INCLUDES A TABLE⁴ PURPORTING TO COMPARE THE COMPANY'S EXCESS OR DEFICIENCY IN EARNINGS IN

⁴ *Dittemore 4, Table 2.*

1 **THE YEARS 2021, 2022 AND 2023, BASED ON TAWC ANNUAL EARNINGS TEST**
2 **FILED AS PART OF ITS CAPITAL RECOVERY RIDER FILINGS. ARE THERE**
3 **ANY ERRORS OR INACCURACIES CONTAINED IN HIS TABLE OR IN HIS**
4 **INTERPRETATION OF HIS TABLE 2?**

5 A. Yes, there are a few errors or inaccuracies within Mr. Dittemore's Table 2 that I will address.
6 According to his Pre-filed Testimony, Mr. Dittemore's Table 2 purports to "compare the
7 earnings (excess)/deficiency of the Company's last three capital rider filings with the \$14.1
8 million revenue increase sought in this proceeding."⁵ First, for the year 2022, Mr.
9 Dittemore's Table 2 indicates the Company had excess earnings in the amount of
10 \$1,175,140. However, an examination of the earnings test calculations and results in TPUC
11 Docket No. 23-00018 evidence that the excess earnings were \$868,017,⁶ representing an
12 adjusted rate of return of 7.58% compared to an authorized rate of return of 7.23%, meaning
13 that TAWC exceeded its authorized ROR by only 25 basis points (0.25 percentage points).
14 The number presented by Mr. Dittemore represents an inflation of the excess earnings
15 resulting from the application of an income tax rate factor of 1.3538212 in order to calculate
16 the proper pre-tax revenue adjustment to refund customers. The actual earnings above
17 authorized were \$868,017. The tax rate should not be applied to excess earnings as the
18 earnings impact to the Company is on a post-tax basis.

19 Second, for 2023, Mr. Dittemore's Table 2 also provides an incorrect amount of excess
20 earnings by the Company. Here, it is worth noting that the 2022 calculation (TPUC Docket

⁵ *Dittemore* 4:6-10.

⁶ TAWC earnings test results showed an actual net operating income of \$18,803,654 compared to an authorized return authorized adjusted net operating income of \$17,935,837, a difference of \$868,017. *See* Direct Testimony of Robert C. Lane, Petitioner's Exhibit-Earnings Test-RCL, p. 2, TPUC Docket No. 23-00018 (March 1, 2023).

No. 23-00018) was an ROR-based earnings test in which the actual ROR was compared to the authorized ROR of 7.23%, while the 2023 earnings test (TPUC Docket No. 24-00011) is an ROE-based test in which the Return on Equity is compared to the authorized ROE of 10%. For 2023, TAWC's earnings test showed an adjusted net income of \$15,748,528 on an Equity Financed Rate Base of \$146,301,521, yielding a Return on Equity of 10.76%, which is 76 basis points (0.76 percentage points) above the 10% authorized in the Company's last rate case. Therefore, the earnings above authorized for 2023 for TAWC was equal to \$1,118,675, not the \$1,505,302 shown in Mr. Dittimore's Table 2. Similar to the previous Table 2 error that I identified above, Mr. Dittimore again inflates the actual earnings above authorized.

Q. WHAT CONCLUSIONS DOES MR. DITTEMORE MAKE IN RELIANCE UPON THE CALCULATIONS REPRESENTED IN HIS TABLE 2?

A. Mr. Dittimore concludes that: 1) utilities in an excess earnings situation based upon historical data such as is reflected in his Table 2 typically do not file a rate case and 2) "[t]hese historical results are not those of a utility needing a significant rate increase."⁷

Q. DO YOU AGREE WITH THE TWO CONCLUSIONS MR. DITTEMORE DRAWS FROM THE DATA PRESENTED IN HIS TABLE 2?

A. No, I do not, for several reasons. As shown below, Mr. Dittimore omits several relevant considerations from his analysis and conclusions. First of all, Mr. Dittimore is comparing historical results of operations and earnings from 2022 and 2023 with a proposed forecast of operation and investments for the Attrition Year of 2025. The Tennessee Public Utility

⁷ Dittimore 4-5.

Commission (“Commission” or “TPUC”) uses a forward-looking test year in rate cases, which in this case is the 12-months ending December 31, 2025 (the Attrition Year). The revenue increase being requested by the Company reflects the increased rate base projected for 2025 based on a 13-month average, increase projected expenses for that period (2025), and a projected Capital Structure for 2025. The historic 2021, 2022, and 2023 earnings are not indicative of the level of earnings necessary in 2025 on the rate base (13-month average) projected to be in service during 2025.

Secondly, the ROE Test and the ROR Earnings Test that preceded it both include adjustments to net income resulting from the exclusion of certain costs based on past regulatory decisions. In 2023, those exclusions resulted in an increase in net income of \$1,686,500. Thus, the entire earnings for 2023, which were in excess of the authorized amount of \$1,118,675, were the result of these regulatory exclusions. These regulatory exclusions of actual costs incurred by the Company in the provision of utility service in this proceeding are included in the revenue deficiency of \$14,173,524 for the Attrition year of 2025.

The third relevant factor is the continued growth in Rate Base from 2023 to 2024, and the resultant increase of equity investment. In 2023, the 13-month average rate base was \$267,385,056. The Company, in its May 1st filing, projected a rate base in 2025 (13-month average) of \$305,777,368. The CAD itself sets the 2025 attrition rate base after its proposed adjustments at \$297,805,860. Additional revenue is required to support this increase in costs, such as depreciation, property tax, and cost of capital associated with this increased investment. As proposed by Mr. Dittmore, if the Company continues to make necessary and prudent investments to provide its customers and the public with safe and

1 reliable water service without additional revenues that support these investments, the
2 Company's Return on Equity to the capital it deployed for assets dedicated to public service
3 would become unreasonably and unjustifiably low.

4 The fourth relevant factor is that the Company is seeking to adjust its ROR to reflect the
5 current cost of capital. Please see the Pre-filed Direct Testimony of TAWC Witness Ann
6 Bulkley, pages 66-68 for a full explanation and support for the Company's proposed rate
7 of return and the Pre-filed Direct Testimony of TAWC Witness Nicholas Furia, pages 5
8 through 10.

9 The fifth factor is to recognize that TAWC did not have any increase in its Capital Recovery
10 Riders in 2023 or 2024. The PCOP did increase to reflect some of the increased production
11 costs in 2022 and 2023, but there was no increase in the Capital Recovery Riders to recover
12 the costs associated with over \$71.5 million dollars of investment made or projected to be
13 made in 2023 through 2024.

14 For these foregoing reasons, the historical earnings in 2022 and 2023 relied upon by Mr.
15 Dittemore for his conclusions have no bearing on the revenue deficiency calculated for the
16 2025 Attrition Year. The earnings in any given year are a result of the revenues received
17 in that year, minus the costs incurred for that year. The earnings for another year are
18 calculated based on the revenues and costs for that year. Mr. Dittemore's reliance on these
19 historical earnings to determine the likely need of TAWC to file a rate case in 2024 for rates
20 effective in 2025 is inconsistent with general and longstanding ratemaking and regulatory
21 forecasting principles, as he, among other things, fails to acknowledge and recognize the

1 increased customer growth, increased expenses incurred and additional investments made
2 between January 1, 2024 and December 31, 2025.

3 **Q. WHAT IS YOUR RESPONSE TO THE CONCERNS RAISED BY MR.**
4 **DITTEMORE WITH RESPECT TO THE PETITION FILED IN THIS CASE?**⁸

5 A. Mr. Dittemore takes issue with the statement made by the Company in Paragraph 7 of the
6 Petition that the Company has “experienced a \$173 Million in Rate Base Growth since the
7 2012 rate case.”⁹ This is a fact. In this case, the Company is asking the Commission to
8 approve base rates based on a rate base of \$305,126,372 million. This amount -
9 \$305,126,372 - is \$173,110,906 more than the rate base of \$132,015,472 from 2012. The
10 increase in investment since 2012 is net of accumulated depreciation, so the actual capital
11 expenditures during this time frame are much larger than the over \$173 million in net rate
12 base addition since the last rate case. Contrary to Mr. Dittemore’s statement, the Company
13 never stated it was not earning on over \$173 million of net rate base investment.
14 Throughout the Company’s testimony and exhibits and in the calculation of the Revenue
15 Deficiency, the Company acknowledges that revenues have been generated by the existing
16 Capital Riders. The Company also has incorporated the Capital Rider amounts into the
17 proposed rates and into the calculation of revenues in existing rates calculations. The
18 Company also has incorporated the Capital Recovery Rider amounts into the proposed
19 rates and into the calculation of revenues in existing rates calculations.

⁸ Dittemore 5-6.

⁹ Dittemore 5:8-12.

1 **V. PCOP RIDER PROPOSED MODIFICATIONS**

2 **Q. TAWC HAS PROPOSED TO EXPAND THE PCOP RIDER TO INCLUDE THE**
3 **INCREMENTAL (OR DECREMENTAL) COSTS ASSOCIATED WITH ITS**
4 **PENSION AND OPEB COSTS. WHAT ARE THE RESPONSES OF THE**
5 **INTERVENOR WITNESSES TO THIS PROPOSAL?**

6 A. Mr. Dittemore suggests that the Company could request the adoption of an Annual Review
7 Mechanism (“ARM”) pursuant to Tenn. Code Ann. § 65-5-103(d)(6), which he states
8 would address the annual volatility of TAWC costs.¹⁰ Mr. Dittemore states that he does not
9 believe that the “Commission should authorize a new, duplicative mechanism to one it
10 already has available.”¹¹ I assume that Mr. Dittemore is referring to the ARM and the
11 PCOP as duplicative. They are not. An ARM would replace the PCOP and other Rider
12 Mechanisms.

13 **Q. DOES MR. DITTEMORE RAISE OTHER CONCERNS WITH INCLUDING THE**
14 **PENSION AND OPEB AS ANOTHER PASS-THROUGH COST RECOVERED VIA**
15 **THE PCOP RIDER?**

16 A. Yes. Mr. Dittemore opposes expanding the PCOP mechanism to allow for the pass-through
17 of Pension and OPEB costs.¹² He states that the Commission should avoid the expansion
18 of piecemeal regulation, which he indicates allows the utility to determine which
19 components can be updated annually and which cannot. In utility regulation, phrases like
20 “piecemeal regulation” often serve as a trigger for something that should be approached by
21 state regulatory commissions with the utmost caution. Still, Mr. Dittemore’s use of this

¹⁰ Dittemore 44:17-20.

¹¹ Dittemore 44:20-45:21.

¹² Dittemore 44-45.

1 phrase in this context appears to overlook the Tennessee General Assembly’s establishment
2 of regulatory alternative methods in Tenn. Code Ann. Section 65-5-103(d) *et seq.* For
3 instance, TAWC’s Commission-approved PCOP Rider identifies certain qualifying costs to
4 be updated annually. As contemplated by the Tennessee General Assembly, the
5 Commission has relied on ARMs for effective and timely adjustment of rates in qualifying
6 circumstances to reflect underlying economics of the business, rather than rely on costly
7 rate cases. Avoiding customer rate shock is also a consideration with respect to ARMs.
8 The role of the PCOP is to allow timely recovery of costs that can vary significantly from
9 year to year and are beyond the Company’s direct control. Pensions and OPEB costs meet
10 this definition and should qualify for recovery under the PCOP Rider. Importantly, the
11 Commission has previously recognized the value of the PCOP Rider. It stated in TAWC’s
12 most recent PCOP Rider docket that, “the PCOP Rider continues to benefit the Company
13 by allowing timely recovery of expenses without having to file base rate cases.
14 Additionally, customers receive immediate refunds when expenses within the PCOP Rider
15 decrease. For these reasons, the panel found the PCOP Rider mechanism remains in the
16 public interest and voted unanimously to approve the Petition.”¹³ The Company proposes
17 using this useful regulatory tool to recover costs, like production costs, that vary
18 significantly and are driven by factors largely outside the Company’s control.

19 The Company believes that Pension and OPEB expenses are good candidates to recover
20 via this Rider because these costs are a significant expense that the Company incurs to
21 provide safe and reliable service to its customers and varies significantly year to year due

¹³ *Order Approving the Revised 2024 Production Costs and Other Pass-Throughs Rider*, p. 6, TPUC Docket No. 24-00002 (July 15, 2024).

1 to factors beyond the Company's control. As stated in my Direct Testimony,¹⁴ the annual
2 amount of the Company's expenses is primarily driven by the Employee Retirement
3 Income Security Act of 1974 ("ERISA"), which covers pensions and other post-retirement
4 benefits. The Commission requires the use of ERISA for calculating such expenses for
5 ratemaking purposes. The expense level can and does result in significant volatility in the
6 annual calculated amount. This expense can fluctuate significantly depending on the
7 performance of the financial markets, the timing of employees' decisions to retire, the
8 retired employees' utilization of the benefits provided, the cost of the benefits provided and
9 the cost of the underlying benefits. These factors are generally beyond the control of the
10 Company, as they are driven by market conditions and the requirements of ERISA. The
11 Company's Pension and OPEB plans have been closed to most new employees since 2006
12 and all employees since 2012 at the latest.¹⁵ These costs reflect only past obligations, and
13 the costs associated with those obligations. The costs are needed to comply with federal
14 law and honor the Company's commitments to its retired former employees.

15 As noted in my Direct Testimony,¹⁶ Tennessee is one of only two states that American
16 Water subsidiaries operate in that uses ERISA for pension expense, the other being
17 California. In California, California American Water is authorized by the California Public
18 Utility Commission to utilize a balancing account to track actual pension and OPEB costs

¹⁴ *Pre-filed Direct Testimony of TAWC Witness Robert C. Lane*, 20:14-22:2, TPUC Docket No. 24-00032 (May 1, 2024) (hereinafter "*Lane*").

¹⁵ For pension expenses, generally, Union employees hired before January 1, 2001, and non-union employees hired before January 1, 2006, are eligible for pension benefits. For OPEB, generally, Union employees hired before January 1, 2006, and non-union employees hired before January 1, 2002, were offered these benefits.

¹⁶ *Lane*, 20:19-21.

1 under ERISA and recover the incremental or decremental balance in rates.¹⁷ The balancing
2 account treatment is similar to what TAWC is proposing in this case.

3 **VI. RATE CASE EXPENSE**

4 **Q. DID INTERVENOR WITNESSES COMMENT ON THE COMPANY'S**
5 **PROPOSED RECOVERY METHOD OF RATE CASE EXPENSES?**

6 A. Yes. The Company has proposed amortizing its forecasted rate case costs over a three-year
7 period and recovering it through base rates. To guard against over- or under- recovery of
8 the actual rate case costs incurred in this proceeding, the Company is also seeking to use
9 its PCOP Rider to reconcile the forecasted amount of rate case costs with the actual amount
10 incurred, and refund or recover any difference through the Rider.

11 City of Chattanooga witness Mr. Garrett and CAD witness Mr. Novak both addressed rate
12 case cost in their respective testimony. Mr. Garrett recommends that rate case costs not be
13 included in base rates but instead deferred and considered in a subsequent docket in which
14 the Commission can fully review and evaluate the expenses and make a final determination
15 regarding the appropriate recovery of the expenses at that time.¹⁸ Mr. Novak recommends
16 in his testimony that, “the Commission omit the Company’s estimated rate case costs and
17 the related amortization from base rates and instead establish a separate surcharge to
18 recover these costs in a separate docket.”¹⁹

¹⁷ See California Public Utilities Commission Decision, Proceeding No. A.10-07-007; Decision12-06-016 Adopted Settlement, Ordering para. 25.

¹⁸ *Pre-filed Testimony of City of Chattanooga Witness Mark E. Garrett*, 41:3-42:2, TPUC Docket No. 24-00032 (Sept. 17, 2024) (hereinafter “Garrett”).

¹⁹ *Pre-filed Testimony of CAD Witness William H. Novak*, 10:16-11:2, TPUC Docket No. 24-00032 (Sept. 17, 2024) (hereinafter “Novak”).

1 Mr. Novak makes this recommendation noting that one advantage of a separate surcharge
2 is that it would consider known costs at the conclusion of the case instead of being based
3 on estimates and that recovery of the rate case costs will end once the rate case amount is
4 fully recovered.

5 **Q. WHAT IS THE COMPANY'S RESPONSE TO THE RECOMMENDATIONS OF**
6 **MR. GARRETT AND MR. NOVAK WITH REGARD TO RATE CASE EXPENSES?**

7 A. The Company disagrees with the recommendations of Mr. Garrett and Mr. Novak and
8 believes that deferring the rate case costs and addressing it in a separate proceeding is
9 neither necessary nor an efficient use of the resources of the Intervenor, TAWC or the
10 Commission.

11 **Q. PLEASE EXPLAIN.**

12 A. It appears that the driver for both Mr. Garrett's and Mr. Novak's recommendations is to
13 ensure that the Company only recovers its actual amount of rate case costs, not its
14 forecasted amount. Mr. Garrett also seems to be requesting that the Commission conduct
15 a prudence review of the rate case costs incurred, where the Commission can evaluate the
16 rate case expenses. Regarding the issue of the Company recovering only its actual amount
17 of rate case costs, the Company's proposal fully addresses this issue. As stated above and
18 more fully explained in my Direct Testimony²⁰, TAWC is proposing to use the PCOP Rider
19 to reconcile the forecasted amount recovered in base rates with the *actual* rate case costs
20 incurred, with any difference between the forecasted amount and the actual amount to be

²⁰ Lane 17-19.

1 returned to or recovered from customers via the PCOP Rider.²¹ By using the PCOP Rider
2 to reconcile forecasted rate case expense against the actual rate case expense, customers
3 will pay only the actual amount of rate case expense (based on a three-year amortization).
4 Once the rate case expense has been fully recovered, the PCOP Rider will be adjusted to
5 offset the rate case expense built into base rates, which effectively removes rate case
6 expense from the costs customers pay for service moving forward.

7 Regarding Mr. Garrett's request to have the Commission evaluate the Company's rate case
8 costs, the Company has provided detailed invoices related to its rate case expenses²² (e.g.,
9 legal invoices for services rendered and fees and consultant invoices), and not a single
10 adjustment to the incurred rate case expenses has been proposed. As such, Mr. Garrett has
11 not shown that there is any need for a *separate* proceeding to evaluate the Company's rate
12 case costs

13 Moreover, the Company is concerned that establishing a separate proceeding in which to
14 address rate case cost recovery will create additional regulatory burden on the parties,
15 create further administrative load on the Commission, and create unnecessary costs to be
16 borne by customers. Interestingly, TAWC's new, revised capital rider includes only one
17 annual filing instead of the previous two annual rider filings, in large part to lessen the
18 administrative burdens associated with a separate annual filing.

19 For the foregoing reasons, the Company continues to recommend that the Commission
20 adopt its proposed recovery method for rate case costs.

²¹ Lane 19:1-11.

²² See Confidential Response to CAD DR 3-006.

1 **VII. CREDIT CARD PROCESSING COSTS**

2 **Q. CONSUMER ADVOCATE WITNESS BRADLEY RECOMMENDS THAT THE**
3 **COMMISSION DENY THE COMPANY’S PROPOSAL TO PLACE THE COSTS**
4 **ASSOCIATED WITH CREDIT CARD PROCESSING FEES WITHIN BASE**
5 **RATES. PLEASE SUMMARIZE MR. BRADLEY’S JUSTIFICATIONS FOR THIS**
6 **RECOMMENDATION, AS YOU UNDERSTAND IT.**

7 A. Mr. Bradley opposes the Company’s request to include credit card processing charges in
8 the Attrition Period Revenue Requirement because he asserts: 1) it creates a customer cross
9 subsidy, and 2) it sends inappropriate price signals to customers.²³

10 **Q. WHAT IS YOUR RESPONSE TO MR. BRADLEY’S POSITION THAT THE**
11 **COMPANY’S PROPOSAL TO HAVE CREDIT CARD COSTS INCLUDED IN THE**
12 **ATTRITION PERIOD REVENUE REQUIREMENT CREATES A CROSS**
13 **SUBSIDY?**

14 A. I do not agree. Mr. Bradley states that the Company’s proposal would have customers who
15 pay by check or cash subsidize the costs of other customers who choose the convenience
16 of paying by credit card. However, Mr. Bradley fails to recognize that the processing of
17 payments by check or money order also incurs costs to handle these transactions. These
18 payments by mail or drop box must be opened, tallied, recorded, and then the check or
19 money order payment information provided to TAWC’s financial institution. These
20 payment handling costs are already included in base rates as an operating expense. TAWC
21 is simply proposing that credit/debit card processing fees be given the same treatment.

²³ *Pre-filed Testimony of CAD Witness Alex Bradley* 13-15, TPUC Docket No. 24-00032 (Sept. 17, 2024) (hereinafter “Bradley”).

1 **Q. ARE THERE OTHER REASONS THAT MR. BRADLEY’S POSITION FAILS TO**
2 **RECOGNIZE OR ACKNOWLEDGE REGARDING CREDIT CARD FEES?**

3 A. Yes. Mr. Bradley’s position does not address that TAWC’s proposal is an opportunity to
4 increase customer satisfaction and improve the quality of service that the Company offers
5 customers. As I stated in my Direct Testimony, the use of credit cards may help customers
6 avoid late payment fees and the discontinuation of service for non-payment and associated
7 reconnection fees.²⁴ These factors contribute to customer satisfaction when doing business
8 with the Company. These factors also demonstrate the public interest considerations as
9 well.

10 Furthermore, and as noted in my Direct Testimony,²⁵ Mr. Bradley does not address that
11 many customers prefer using a credit card. Customers have expressed some dissatisfaction
12 with being required to pay an additional fee for paying by a credit or debit card. In the
13 feedback TAWC collects from customers²⁶, multiple customers have voiced their
14 dissatisfaction with the credit card fees. Below are some of their comments:

- 15 • “I object to the charge incurred when paying my bill by phone.”
- 16 • “The bill pay, however is frustrating. You charge me to pay my bill in any way
17 other than walk in. And I must pay each bill (house and irrigation) separately and
18 get charged for EACH one. Other utilities do not do this and it makes me feel taken
19 advantage of. I honestly don't believe I should have to pay you anything to pay
20 you”
- 21 • “I’d like the ability to set up auto payments to my credit card (not debit card)
22 without a fee. A lot of utility companies are allowing that now and it helps me by
23 being able to make one payment per month to pay for various services.”

²⁴ Lane 16.

²⁵ Lane 16 fn 2.

²⁶ These comments were collected from customers as part of two customer survey tools to measure the Company’s customer satisfaction.

- “TAWC charges a fee to pay online or over the phone. That’s cheap and antiquated STOP charging a fee to pay online or over the phone!”
- “The fee for paying with a card is pretty ridiculous.”
- “Eliminate the processing fee for online bill pay”
- “Stop charging customers an extra fee just to pay their bill online or by phone”.
- “Don't charge a fee to pay bill online”
- “drop the \$1.95 when bills are paid by phone”
- “Remove fees for payment.”
- “don’t charge me for paying my bill on time every time on phone”
- “be allowed to pay water bill automatically with credit card and with no extra charge”
- “I just don't understand why you have to pay to pay your water bill this is the only thing that troubles me it's the dollar 95 I don't feel that it matters as long as I just pay my bill I have no problem with my bill is the same every month I just don't understand the \$1.95”

TAWC’s proposal is an opportunity to increase customer satisfaction and customer convenience and improve the quality of service.

Q. DOES MR. BRADLEY ADDRESS WHETHER CUSTOMERS ARE INCREASING THEIR USE OF CREDIT CARDS TO PAY THEIR TAWC BILLS?

A. No. As the Table below demonstrates consumer use of credit and debit cards to pay water bills is increasing, up 45.5% since 2019. This represents a cumulative year-over-year growth rate of 7.9%.

Table 2 Tennessee American Water 2019 - 2023 Credit Card Transactions Counts (Paymentus)					
2019 - 2023 Credit Card Transactions Counts (Paymentus)	2019	2020	2021	2022	2023
Visa	39,740	42,841	50,993	62,674	84,906

Information provided by the Vendor Paymentus.

American Express not offered for use by TAWC until 2021.

Q. DO YOU AGREE WITH MR. BRADLEY’S CONTENTION THAT RECOVERY OF THESE FEES IN BASE RATES IS NOT IN THE PUBLIC INTEREST?²⁷

A. No. In a competitive market, pressures would require a competitor to continue to enhance its customer service offerings to provide convenient options to customers for paying their bills. Regulators should allow, even encourage, such behavior among utilities, including TAWC. The Company believes this request is consistent with customer expectations, will improve customer experience and will serve the public interest.²⁸

VIII. RECOVERY OF CUSTOMER-OWNED SERVICE LINES THROUGH QIIP

Q. DOES THE CONSUMER ADVOCATE SUPPORT THE COMPANY’S PROPOSAL TO REPLACE CUSTOMER-OWNED LEAD SERVICE LINES, INCLUDING

²⁷ Bradley, 14:18-20.

²⁸ As I explain in my Direct Testimony at 16:11-18, even the National Association of State Utility Consumer Advocates (“NASUCA”) have concluded that it is in the public interest to give customers the option of paying with debit or credit cards without a fee.

1 **COPPER AND GALVANIZED STEEL, AND RECOVERING THE COSTS VIA**
2 **THE CAPITAL RIDER?**

3 A. No. CAD witness Bradley recommends that the Commission deny the Company's request
4 to replace customer-owned lead service lines and recovery of the costs via the Capital
5 Rider. The CAD takes this position even though it acknowledges that this is a nationwide
6 problem that needs to be addressed.²⁹

7 **Q. HOW DOES MR. BRADLEY JUSTIFY THIS POSITION?**

8 A. Mr. Bradley states that his reasons for recommending that the Commission deny the
9 Company's request is because the Tennessee Legislature has not directed the Commission
10 to approve the replacement of customer-owned lead service lines and recovery of those
11 costs and the Company's proposal creates a customer cross-subsidy that will result in some
12 customers in newer dwellings subsidizing the cost of replacing customer lead service lines
13 for customers who live in older dwellings. He also notes that while the Company may be
14 successful in identifying and replacing customer-owned lead service lines, some risk will
15 remain.³⁰ Mr. Bradley misunderstands the law and the risk. The Tennessee Legislature has
16 declared:

17 All pipes, pipe or plumbing fittings or fixtures, solder, or flux that is used in the
18 installation or repair of any public water system shall be lead free; provided, that
19 this subsection (a) shall not apply to lead joints necessary for the repair of cast iron
20 pipes.

²⁹ *Bradley* 15-19.

³⁰ *Id.*

1 Tenn. Code Ann. § 68-221-720(a). And, the Tennessee Department of Environment and
2 Conservation (TDEC) has, since at least 2012, **required** water systems to replace lead
3 service lines under certain circumstances. *See* Tenn. Comp. R. &
4 Regs. 0400-45-01-.33 (emphasis added). Additionally, TDEC has announced and begun
5 training on the changes to the federal Lead and Copper Rule.³¹ For further discussion on
6 the requirements for replacement of lead service lines, see the Direct Testimony of TAWC
7 witness Grady Stout, pp. 18-26.

8 **Q. PLEASE ADDRESS MR. BRADLEY'S STATED REASONS FOR**
9 **RECOMMENDING THAT THE COMPANY'S REQUEST TO REPLACE**
10 **CUSTOMER-OWNED LEAD SERVICE LINES AND RECOVER THE COSTS**
11 **THROUGH THE CAPITAL RIDER BE DENIED.**

12 A. While the Consumer Advocate states they agree this is a country-wide problem that needs
13 to be addressed, the CAD states that the Commission should not take action to address this
14 issue unless directed by the Tennessee Legislature.³² The fact that the replacement of lead
15 service lines is not specifically required by statute is not determinative of whether it is
16 appropriate or not to replace and recover these costs through the Capital Rider. It is
17 noteworthy here that Mr. Bradley appears not to expressly contend with any support that

³¹ TDEC Lead and Copper Rule, <https://www.tn.gov/environment/program-areas/wr-water-resources/water-quality/drinking-water-redirect/lead-and-copper-rule.html> (last visited Oct.15, 2024).

³² *Bradley* 18:1-7. As concerning Mr. Bradley's reference to other states' legislative action in defense of his recommendation (*Bradley* 18:note 14), he does not appear to argue that these state legislatures expanded the jurisdiction of their respective state commissions to allow them to take this action; but rather, that these state legislatures directed their respective state commissions to take action. For instance, some years ago the Tennessee General Assembly passed legislation directing the Commission to fully deregulate intra-state long distance calls. The Commission had the authority to deregulate such calls but had not fully exercised its existing authority. Likewise, here the Commission has the authority to take action regarding lead service lines without the need for jurisdictional expansion.

1 the Commission does not have the authority to allow this recovery.³³ As I explained in my
2 Direct Testimony, the Company recommends recording these costs to account 333 –
3 Services consistent with the guidance found within the Uniform System of Accounts
4 (“USOA”).³⁴ In accordance with the USOA account 333, capitalized mains include the
5 installation cost of pipes and accessories, as well as costs related to damages to the property
6 of others, and other general costs relating to restoring areas to a safe or prior condition. The
7 replacement of customer-owned lead service lines is like the restoration of other customer
8 property and these restoration expenditures should be capitalized to plant as part of overall
9 project costs.

10 Mr. Bradley also argues that the Company’s proposal results in the cross-subsidy of one
11 group of customers by another. The Company’s proposal in this instance is no different
12 from the inclusion of restoration costs incurred at a particular customer’s premise to return
13 their property to a safe condition after performing work in that area. This includes
14 restoration of sidewalks in front of a home that are disturbed while replacing Company
15 owned service lines that extend beyond the sidewalk to the customers property line.
16 Restoration of the sidewalk would be included in rate base as well as repaving of the
17 street. The Company routinely makes a variety of expenditures on property that is not
18 owned by the Company that serves only a small number of customers – or even only one

³³ In fact, the Commission’s authority is plenary. *See Consumer Advocate & Protection Div. of the Office of the Atty. General of Tenn. v. Tenn. Regulatory Authority*, 2012 WL 1964593, at *14 (Tenn. Ct. App. May 30, 2012) (“The Tennessee legislature’s grant of authority to the TRA is broad indeed. By statute, the General Assembly has explicitly granted the TRA practically plenary authority over the utilities within its jurisdiction.”). *See also Consumer Advocate Div. v. Greer*, 967 S.W. 2d 759, 761-62 (Tenn. 1998) (“In fact, the Legislature has explicitly directed that statutory provisions relating to the authority of the TRA shall be given “a liberal construction” and has mandated that any doubts as to the existence or extent of a power conferred on the TRA shall be resolved in favor of the existence of the power, to the end that the TRA may effectively govern and control the public utilities placed under its jurisdiction[.]”)

³⁴ *Lane* 26-28.

customer – that are capitalized, included in rate base and are allocated across the Company’s entire customer base.

Society as a whole, bears much of this cost of the adverse health effects from prolonged lead exposure. Reducing this impact has long been an important public health goals. The Tennessee Department of Health has found that lead exposure is a serious environmental public health threat to children in Tennessee.³⁵ Reducing this impact has long been an important public health goal.

Additionally, given that the replacement program will take place over a period of up to ten years, the effect on customers will be minimal. The positive effect of essentially eliminating lead from the Company’s water system along with customer-owned service lines, however, will be great and fully in accord with the public health and welfare and the public policy of Tennessee.

IX. PROPOSED TARIFF RULES AND FEE CHANGES

Q. DID ANY OF THE INTERVENOR WITNESSES ADDRESS THE COMPANY’S PROPOSED TARIFF RULES AND FEE CHANGES?

A. Yes, Mr. Novack on behalf of the Consumer Advocate addressed the Company’s proposed tariff changes.

Q. PLEASE SUMMARIZE MR. NOVACK’S POSITIONS RELATED TO THE COMPANY’S PROPOSED TARIFF RULE CHANGES.

³⁵ See Tennessee Department of Health, “About Childhood Lead Poisoning Prevention,” <https://www.tn.gov/health/health-program-areas/fhw/tn-clpp/about-clpp.html> (last visited 10/4/2024).

1 A. Mr. Novack stated that the Consumer Advocate did not oppose the following tariff changes
2 proposed by the Company:

- 3 • Increasing the number of days before from a late fee is applied from 15 days to 27 days.
- 4 • Increasing the number of days before service is disconnected for non-payment from 20
5 to 30 days.
- 6 • Increasing the length of TAWC's supplied distribution mains for new service from 45
7 feet to 100 feet.
- 8 • New tariff language regarding Private Fire Service.
- 9 • Deletion of an application and payments of fees to the TPUC for meter testing.³⁶

10 **Q. PLEASE SUMMARIZE MR. NOVACK'S POSITIONS RELATED TO THE**
11 **COMPANY'S PROPOSED CHANGES TO TARIFF FEES.**

12 A. Mr. Novak states that the Consumer Advocate does not oppose the following rate and fee
13 changes proposed by the Company:

- 14 • Rate reset of the Capital Rider and the PCOP Rider to \$0.00.
- 15 • Turn on Charges increase from \$15.00 to \$30.00.
- 16 • Reconnect Charges increased from \$15.00 to \$30.00.³⁷

17 However, Mr. Novak states that the Consumer Advocate does oppose two of the
18 Company's proposed tariff fee changes, which are (1) the establishment of an After-Hours

³⁶ Novak, 27:16-30:3.

³⁷ Novak, 31:3-34:3.

Charge of \$40.00 unless the Company defines “normal business hours” within the tariff and (2) the increase in the amount of the meter tampering penalty fee, from \$92.00 to \$250.00.

Q. REGARDING THE AFTER-HOURS CHARGE, MR. NOVAK STATES THAT THE CONSUMER ADVOCATE OPPOSES THIS CHANGE BECAUSE THE COMPANY DID NOT DEFINE “NORMAL BUSINESS HOURS” IN THE TARIFF, BUT WILL REMOVE ITS OBJECTION IF THE COMPANY DOES SO. PLEASE RESPOND.

A. I agree with the Consumer Advocate that the Tariff should define “Normal Business Hours” if the Company is to charge an After-Hours charge. The Company will revise its Tariff to define “Normal Business Hours” as 7:30 a.m. to 4:00 p.m. Please see the proposed TPUC amended Tariff Page: TPUC No. 20, Original Sheet No. 20 is attached as TAW RT LANE Exhibit 3.

Q. REGARDING THE METER TAMPERING FEE, MR. NOVAK STATES THAT THE COMPANY HAS NOT ESTABLISHED THE NEED FOR INCREASING THE FEE.³⁸ PLEASE RESPOND.

A. The meter tampering fee is designed to be a deterrent for customers tampering with meters to either reconnect their service without authorization by bypassing the meter or trying to bypass the meter (in whole or in part) in order to steal water. The amount of the fee is not cost-based but is designed to be severe enough to deter customers from illegally tampering with the meter. This fee has not increased since at least October 2012, and over the past 12 years the deterrence effect of this fee has eroded with each passing year.

³⁸ Novak 33:15-19.

As shown in Table 3 below, TAWC averaged 388 customer accounts³⁹ each month which were Inactive With Consumption (IWC). IWC means that the meters show usage, but water service has been turned off by the Company. (See Table 3 below). Each of these customers illegally restored water service and could be subject to the Meter Tampering Penalty Fee. The Meter Tampering Penalty Fee would be another tool for the Company to use to deter such behavior. Increasing this Fee as requested by the Company will provide a greater deterrent effect to customers considering restoring their service illegally. Mr. Novack does not take into account that the current meter tampering fee only applies to customers that relocate their meter to reconnect. This is too restrictive and does not address the most common way people reestablish service illegally, which is to break into the meter box, frequently breaking the lock or causing other damage to utility property, and turning the service back on. The proposed new Meter Tampering Penalty Fee will apply to all instances where the customer illegally restores water service, deterring this illegal and costly behavior.

- Enterprise Solutions Capital Plan Update adjustment revised the Attrition Year Utility Plant in Service by \$1,260,130 and CWIP by \$1,021,179 in Exhibit RB-2.1-UPIS

TENNESSEE-AMERICAN WATER COMPANY

TPUC No. 20
Original Sheet No. 12**CLASSIFICATION OF SERVICE****DISCONNECTION – RECONNECTION CHARGE**

When it becomes necessary to discontinue water service to any premises because of a violation of the Company's Rules and Regulations on account of non-payment of any bill for water service, a charge of thirty (\$30.00) dollars may be incurred to cover the expense involved with disconnecting and reconnecting the service. (C)

If a customer's water service is discontinued for non-payment of sewer service and such customer is a sewer customer of an entity that has contracted with the Company for disconnection within five (5) days of notification by the sewer entity, a charge of forty-eight dollars (\$48.00) may be made to cover the expense involved.

In the event a customer's water service has been discontinued by the Company and said customer re-establishes services illegally, the Company will take steps to de-activate the service line to the customer. In order to re-activate the service in such circumstances, a meter tapering penalty fee and a disconnection-reconnection fee may be incurred to cover the expense of re-activating the service.

If a customer requests reconnection after hours, there will be an additional \$40.00 charge applied in addition to the standard reconnection fee. After hours is defined as anytime outside of the hours of 7:30 am to 4:00 pm Monday through Friday. (N)

METER TAMPERING PENALTY FEE

Any customer who removes or relocates, or cause or permit the removal or relocation of a meter by their agent once it has been installed by the Company, may be subject to a meter tampering penalty fee of two hundred and fifty dollars (\$250.00) (N)

RETURNED CHECK CHARGE

When a payment is returned for non-sufficient funds, a charge of \$20.00 will be made to cover the expense involved.
