Hello, I am writing this email to oppose the rate increase that the Tennessee american water company is requesting. One of the main reason behind my decision is the fact about 6 years ago TAW attempted to take over the signal mountain water provider knowing they are the middlemen of the operation. I say this for the fact that if one was to investigate they would see hixson utility and other utilities in Hamilton county such as signal mountain water utility source their water from tennessee american water company. Two they have not stated how this hike will effect the Comercial rate and how much the muncipalities are charged for thing such as hydrant usage. There is not enough information put out by Tennessee american water for the reasons for an increase. They have taken on more responsibilities probably in hopes to one day cit out being the middle man Then the question arises how much in additional funding has tennessee american water received? Like, how much have they received for captial improvements from the tennessee drinking water stater revolving funds. And have they put in request to receive any future funds. This hike also seems to collate with the announcement from the Environmental protection agency's ruling on mandatory replacement of all lead pipes in 10 years. Which this would greatly effect TAW and homeowners in the Hamilton county area. Thanks Christopher Dahl
