RE: *Petition of Limestone Water Utility Operating Company, LLC to Increase Charges, Fees and Rates and for Approval of a General Rate Increase and Consolidated Rates [Phase 2 Increase], TPUC Docket No. 24-00044*

Dear Ms. Mairs:

We are in receipt of your data requests to Limestone Water Utility Operating Company, LLC (“Limestone”), dated April 3, 2026. Please find Limestone’s responses below.

1. *Please provide the monthly billed usage for each Aqua water customer, categorized by meter size, from January 2025 through the most recent month available.*

Response: Please see the attached **CONFIDENTIAL** Excel workbook, which provides monthly billed water usage for each Aqua water customer from January 2025 through April 2026, categorized by meter size and is being submitted **UNDER SEAL** as **CONFIDENTIAL AND PROPRIETARY**. The workbook also includes a pivot table summarizing total billed usage by month and by meter size for ease of reference.

2. *The estimated water usage for the Phase 1 rate case was 21,240,360 gallons, based on an average monthly consumption of 1,770,030 gallons, as shown in the Company’s Exhibit AJS 5.1. However, the actual billed water usage for the 12-month period ending December 31, 2025, was only 14,033,940 gallons. This actual usage level is significantly lower than the Phase 1 billing determinants approved in the rate case. Please explain the reasons for this decline in water usage. Specifically, indicate*

BUTLER SNOW LLP

whether the decrease is due to changes in metering, billing adjustments, operational modifications, or other contributing factors.

Response: Limestone is not aware of the specific reasons for the reduction in billed water usage at the Aqua Utilities community during the referenced 12-month period. However, the Aqua Utilities system primarily serves a second home community, and water usage can vary significantly based on customer occupancy patterns and discretionary usage, including outdoor irrigation.

Following the implementation of Phase 1 rates, it is reasonable to expect that customers may have adjusted irrigation schedules, reduced seasonal usage, and/or altered visiting or occupancy patterns in response to higher water rates and broader water conservation awareness, which may have contributed to lower billed usage. For example, as seen in response to DR 1, 2025, February usage was approximately 791,000 gallons, while 2026 February usage was approximately 400,000 gallons.

Limestone is not aware of any additional changes in metering practices, billing methodologies, billing adjustments, or operational modifications during this period that would have resulted in the observed decrease in water usage.

3. *Please provide copies of all bills from the Savannah Utility Department that show purchased water in gallons from January 2025 to the most recent month available.*

Response: Please see the attached copies of bills from the Savannah Utility Department showing purchased water volumes in gallons from January 2025 through the most recent month available.

4. *Please provide a narrative explaining the justification for each individual rate increase. For example, Limestone has proposed raising the DSH commercial rate in Phase 2 from \$55.00 to \$57.60 per Equivalent Residential Unit (ERU) for commercial customers, resulting in a 4.72% increase. In contrast, Limestone has proposed increasing the Shiloh Falls commercial rate from \$55.60 to \$163.92 per ERU, representing a substantially larger increase of 194.82%. Please explain the reasoning behind these differences and provide justification for each rate adjustment.*

Response: In developing the Phase 2 rate adjustments, Limestone sought to implement the remaining Commission approved revenue requirement in a manner consistent with both the Commission's Final Order and the rate design approved in Phase 1. In its Final Order, the Commission directed Limestone to prioritize maintaining affordable residential rates, while shifting a higher portion of the additional revenue recovery to commercial sewer customers. Limestone followed this direction while maintaining the structure and relative relationships established under the Phase 1 rate design.

Consistent with Phase 1, Limestone allocated the Phase 2 revenue increase across individual systems and customer classes using the proportion of Attrition Period

Revenues approved by the Commission in Phase 1 for each respective service. This approach resulted in comparable annual revenue increases for certain commercial customer groups across systems, rather than uniform percentage rate changes.

For example, Limestone proposed an annual commercial revenue increase of approximately \$34,000 for DSH and approximately \$32,000 for Shiloh Falls. These increases are consistent with the relative magnitude of the Phase 1 Attrition Period commercial sewer revenues approved for each system, which were \$94,384 for DSH and \$91,406 for Shiloh Falls, respectively.

The differing percentage changes in the resulting commercial ERU rates are driven by differences in the underlying billing determinants—including the number of commercial ERUs billed within each system—and not by a disproportionate assignment of revenue responsibility. Accordingly, although the Shiloh Falls commercial ERU rate reflects a larger percentage increase than the DSH commercial ERU rate, the total annual revenue recovered from commercial customers in each system remains generally consistent with the Commission approved allocation methodology.

As required, copies will follow. Please feel free to reach out to me if you have any further questions.

Very truly yours,

BUTLER SNOW LLP
