

To the members of the Tennessee Regulatory Authority considering a proposal from the Antioch Water Company regarding a rate increase.

May 8, 2000

Gentlemen and or Ladies;

As a resident and user of Antioch Water Co., I propose that you limit their request for an increase in the monthly rate to a maximum of 25.00 per month, which should adequately fund their present needs to modernize and update the system. While we are full time residents, about 75% of the users are summer only, occasional residents. A larger increase would put a tremendous hardship on their continuing as vacation or weekend users.

We are concerned about the quality and service and support an equitable increase, but reiterate that the requested amount is far out of their present need, and would not be good for the community as many would go to wells and further damage their viability.

I send this message with a neighbor to present this request.

Page 1

We, the following customers of Antioch Water District believe that the proposed increase in our billing is way out of line for the service we receive.

Our water pressure is not up to par.

If there is a leak on the service end it can take up to two or three weeks to have repairs made.

When repairs are made there is no effort on Antioch Water to reestablish lawns to original condition.

A rate increase of over 100% is not in line with any cost of living increases or wage increases.

We believe a minimal increase would be in line if service and pressure are provided.

To whom it may concern.

My name is David Hauke. I have a place at Atwell Drive, Antioch. I've been notified of a rates increase on water. The rates as I have heard is to increase about 140 %. I think that this is way too much. We are only part time; we only go about every weekend from May thru August. The rate I will be paying will be higher than I pay in Martin where I use it everyday. The pressure that we have is very low but being we use it only on weekends, I haven't complained.

OFFICE OF THE
EXECUTIVE SECRETARY

My name is Greg Stover and I own a house on Sloan Rd in the Antioch community . This is only a part-time vacation home for my family. We recently heard the Antioch Water Company is raising the water rates by a very large amount. We are very opposed to this extremely high rate increase. When they raise these rates, we will be paying more for our part-time water in Antioch than we normally pay for our full-time water in Martin, TN. We would appreciate any help concerning with this matter in the future.

Thank You,

Greg Stover
