Electronically Filed in TPUC Docket
Room on July 20, 2026 at 2:24 p.m.

Honorable David Jones, Chairman
Tennessee Public Utility Commission
502 Deaderick Street, 4th Floor
Nashville, Tennessee 37243

Re: **Edge Wastewater Utilities, LLC.**
Supplemental Information to Certificate of Convenience and
Necessity No. 26-00017

Dear Chairman Jones,

On March 2, 2026, Edge Wastewater Utilities, LLC. ("Petitioner") filed a request for a New Certificate of Convenience and Necessity for a project in Maury County, Tennessee, hereinafter referred to as the "Baker Farms Project" (the "Petition"). TPUC issued the Petition the docket number 26-00017. In accordance with a Request for Additional Information from Michelle Mairs, Audit and Compliance Director, dated July 15, 2026, Petitioner tenders the following information to clarify certain aspects of the Petition.

RQUEST: Section 18 – Treatment System Contractor & Construction Agreement

Per Commission Rule 1220-04-13-.17(2)(c)(4), petitions for a CCN must include proof that the contractor selected to install the proposed system holds a valid and current contractor's license with an adequate monetary limit. In response to a data request issued by Commission Staff, the Petitioner stated that it will subcontract the construction of the treatment facility and land application areas to A&R Excavating, LLC.

However, this proposed change does not resolve the issue because the prime contractor must have a valid and current contractor's license with an adequate monetary limit to cover the \$1,654,510 cost of constructing the project. Edge Wastewater, LLC, as the prime contractor, does not have a contractor's license that covers the cost of construction for this project.

Accordingly, please explain how the Petitioner and Developer intend to remedy this non-compliance with Commission Rules. In response to this matter, the Petitioner must provide sufficient documentation to demonstrate compliance with Commission Rule 1220-04-13-.17d(2)(c)(4).

EDGE WASTEWATER

RESPONSE: The Developer is executing an agreement with A&R Excavating LLC as the prime contractor for the construction of the treatment facility and land applications areas. The executed Construction Agreement will be submitted to TPUC as Supplemental Information by July 31, 2026.

Thank you for your consideration.

Sincerely,
Edge Wastewater Utilities, LLC.

R. Matthew Nicks,
President
